DETAILED ACTION

1. Claims 1-7, 13 and 16-17 are cancelled.

Allowable Subject Matter

2. Claims 8-12, 14-15 and 18-19 allowed.
3. The following is an examiner's statement of reasons for allowance:

As per claims 8 and 11:

The prior art of record (Seaton et al., U.S. 5,591,299) discloses a system to remotely control a semiconductor spray processing tool. Seaton fails to teach a remote operation device being authenticated by a host device once connected and then individually simultaneously displaying a same screen as that displayed on each of the host devices, permitting the remote operation device to remotely control and operate the host devices. None of the other references cited in the prior action combine with Seaton to disclose these limitations recited in the claims.

An updated search did not uncover any new prior art. No art disclosing, nor motivation to combine has been found which recites the authentication of a remote operation device by host devices, thus being allowed to control them in addition to displaying identical screens simultaneously on both the host device and remote operation device. All other claims depend from allowable claims 8 and 11 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
